ABSTRACT

With the growing of social intercourse in the international scope, the ability to speak in English language is one of the needs that must be owned by all people. English language is often used in the work environment, campus, even for use in day-to-day. One of the facilities to test ability in English through EPrT (English Proficiency Test) that is designed to measure the ability to speak English for a foreign speaker in the context of the academic field.

In the test EPrT that usually includes 3 parts i.e. , listening, grammar, and reading. The section that requires deep understanding of English is grammar part. This website application is intended to help participant candidates of EPrT test in particular, and common user to increase their knowledge of grammar. This application will be online so that can be accessed by wide society.

Website application is built in the Windows XP operating system environment using Macromedia Dreamweaver with PHP as the language programming, MySQL database, Apache Web Server, and various other supporting applications.

Keywords: English language, EPrT, grammar, website
