

## **ABSTRACT**

The developing of rental increase greatly nowadays, because it is easier and also cheaper than buying then new ones. One of those is VCD/DVD rental in EZY VIDEO, Buah Batu. EZY VIDEO is a rental VCD/DVD ,which had a lot of member, and a lot of VCD/DVD had rent. So,for run this rental needed application which help the employee for serving, and help the member to know about EZY VIDEO's information. After seeing the needs, we make this VCD/DVD rental application in EZY VIDEO.

This application is made to help the employee in serving / doing the rental transaction , about the data of member, the employee, the transaction, the price, and the fine. It helps the employee in making the report. It also give the members the alternative to know the VCD/DVD's information or renting the VCD/DVD via (through) SMS (Short Message Service) instead of come directly. Beside helping the members, it also helps EZY VIDEO in giving the information because it is done via (through) SMS.

This application is implementation using Delphi as a language programming, and SQL Server as a database.
