

ABSTRACT

ST3ALTH is a community which its member is a students in Telkom Institute of Technology whom like to collect Air Soft Gun. Within this community, the member can share all information about air soft gun and events itself.

Mean while, the information system of ST3ALTH community hasn't build yet. Furthermore, in communicating ideas and connecting the members, they use the official forum of students of Telkom Institute of Technology at <http://students.ittelkom.ac.id>

This final project was implemented on web based software, so the members of ST3ALTH could have an ease of access, including publishing their air soft gun collection and also the non member could see it online. In this application, every registered member have their own photo gallery which can be seen by other members and either the visitors. This system is built on the analysis of the needed and the structured design. PHP and HTML is used as programming language, while MySQL as the database.

The built web could store photos of the air soft gun's collection. Every registered member is facilitated on uploading photos and article. This website is located on a server so it is allowed for the online access from the members and either the visitors

Keyword : *ST3ALTH, Airsoft gun , website, PHP, MySQL.*
