

ABSTRACT

YAHDI (Yayasan Haji Daarul Ihsaan) as a Kelompok Bimbingan Ibadah Haji (KBIH) another one business process is selection of candidate of pilgrimage guider. At YAHDI of selection of guider candidate still have the character of subjective so that result of decision less with quality and unfavorable, so needed Decision Making Support System by using AHP (Analytical Hierarchy Process) model.

The results of the analysis be obtained by score of each guider candidate of pursuant to criteria that is candidate of guider A own score 21.1%, and then be followed by D with score 20.9%, and then E with score 19.6%, and then B with score 19.4%, and the last of C with score 19%.

Decision Support System(DSS) will be developed by using PHP(Hypertext pre processor) for programming language and MySQL for database process.

Key word = guider, DSS, AHP, PHP, MySQL
