ABSTRACT

Library is one of media to get every information about science, technology, and also religy by reading in here.

Library of MTS Negeri Prembun that located at Kebumen is a facility held by school committee for being a learning support media for students and for being teaching support media for teachers. Borrowing, return ,book investment, and problems of making report activity using the big book sometimes held difficulties for the librarian. The difficulties commonly faced are problems of saving data, problems of searching data in the big book. So that, the library information system that have functionality is made to make the librarian job be easy in library administration and also make the student easy to get information about library expecially the books information.
