ABSTRACT

Dormitory of IT Telkom using selection system to new student who wants to live in dormitory. The selection is interview, the purpose is to get more information from new student, so that the interviewer can know who is qualified.

This Final Project built Decision Support System to help interviewer make decison. This system is created based on analysis and design by using the waterfall method. PHP and Javascript as programming language, Macromedia Dreamweaver as HTML editor, Adobe Photoshop for interface design, and MySQL used to database management.
