

ABSTRACT

SMK Boedi Oetomo Cilacap is located in the City of Cilacap. Student Attendance Management SMK Boedi Oetomo Cilacap still using Microsoft Excel application. This led to the disintegration of the data that is often less effective and efficient, especially in terms of time and effort.

Therefore, the SMK Boedi Oetomo Cilacap need applications that can assist in the management of student attendance. Student Attendance application was made in hopes of helping the school is responsible for managing the Student Attendance Data. Moreover, it can provide information about the Student Attendance of data to other users who need the information.

Student Attendance application is built by implementing the concept of MVC so hopefully easily in further development. This application was built using the programming language PHP with CodeIgniter framework and MySQL database as a data base.

Keywords : *Student Attendance, Management ,MVC, Codeigniter*
