Abstract

Every management administration of Informatics Faculty finance until now still done manually and very not effective. Every making a reporting of finance in one period, each staff of finance make a reporting for a certain period. So,it may the reporting of finance are making in various version between one staff and another staff, does not preclude can make nominal difference in financial considerable and different in every reporting. This also can make invalid data.

Because of that,faculty of Informatics need an application which can save all the management administration of finance, start with planning of finance,monitoring of finance and reporting of finance. This final project entitled "Application of Reporting and Financial Analysis of Informatics Faculty IT Telkom" have a performance for make the consistent reporting of finance. So that, does not happen again invalid data about nominal of finance in Informatics fakulty.

This application of reporting be expected can help the staff of finance for make reporting of finance more efective and effisien, and also facilitate for monitor expenditure and income of finance in faculty. Beside that, reporting of finance also for appraisal for BAN,DIKTI,etc, so that the reporting of finance have an important role for accreditation assessment of an institution
