

Abstract

The research in Informatics Engineering Faculty IT Telkom improves every year. The research which are done by students and teachers so hopefully can be applied for better daily life, must be done in right plan, right stages, and complete documentation.

The reseach documentation covers from research planning until research implementation. The purpose of it is collecting all research in Informatics Engineering Faculty so can be used for the faculty accreditation process and other research.

The importance of research documentation is the reason why web based application for research planning and implementation data processing in Informatics Faculty with CMS Joomla and MySQL database will be developed.

Keyword : planning, implementation, research, joomla, CMS, MySQL, web
