

Abstract

The value of the subjects obtained by students in the classroom is one of the most important components of an entity in schooling. It will be the quality of the development parameters are summarized school students into an academic report. Academic report consists of academic value, productive value, and social value obtained from their daily lives at school.

During this academic report student at SMAN 1 Payakumbuh reported each semester in the form of report cards whose described student values obtained in the latter half of the students in his class with rank. sometimes files may be lost and forgotten enter through carelessness or other events that cause lost report card file. Actually, value will be the items that are vital to all academic institutions. This application makes process documentation the values of students and other components will be stored on the website and its management will be easier because all the calculations are done by the application entirely.
