

ABSTRACT

KSR PMI Unit IT Telkom is one of the Student Activity Unit in IT Telkom and is move in the humanitarian. routines are often implemented by KSR PMI Unit IT telkom is Blood Donation are implemented every 3 months in IT Telkom. Blood Donor activities are conducted not escape cooperation the Blood Donor Unit (UDD) kab.Bandung to pick up and deliver blood to the blood bank that is in and out kab.Bandung.

All this time the implementation of the activities Blood Donor conducted KSR PMI Unit IT Telkom in the input data the results of the activities are still done manually input data using MS Office applications (Excel). Besides the unavailability of applications that contain all the information so that the results of the stored data is still questionable validity.

The application development aims to reduce the data that is questionable validity in a series of activities conducted Blood Donation KSR IT Telkom PMI unit, so KSR PMI unit can manage IT Telkom Blood Donor Families (KDD) is better.
