Abstract

An elections is the leader election process to fill a certain position for a diverse, such as the president, elected representatives at various levels of government down to the village head. In an organization, election is certainly needed to fill a position. The organization here mean the "Student Activity Unit of Aceh Culture" in IT Telkom college.

During this process the electoral business unit chief of the "Student Activity Information of Aceh Culture" in IT Telkom is still manual exposure ranging from the vision and mission of the new candidates for chairman of the SME, during the selection process, until the time of the the announcement of the election results. There are so many problems showing up, such as excessive use of paper, the selection process until the outcome of the elections which took times. Makingan application is intended to provide an alternative to the electoral process of the new chairman facilitate members of the conclave process.
