

ABSTRACT

Gundu, congklak, and engklek are Indonesian traditional games that played often by kids these days. This is happened because the space that required to play these games is not as much as the old times, or because the tools for playing these games is harder to find now. Gundu and engklek is usually played in a field or the other opened area. And for playing congklak, requires some tools like the congklak board.

With technology growing rapidly now, video game is one from many source of entertainment that chosen by children to amuse them in their free time. Especially games on mobile platform, like Android, because children can play it anywhere and anytime.

Based on above thoughts, *Game Application Dhambul 3 in 1* is being developed. *Game Application Dhambul 3 in 1* is a game based on Android platform which contains several traditional game from Indonesia, like gundu, engklek, and congklak. With mobile platform growing rapidly nowadays, especially Android, *Game Application Dhambul 3 in 1* would introduce gundu, congklak, and engklek to children and have same playing experience like the real thing.
