ABSTRACT

Football is a very popular sport in Indonesia is no exception in Bogor . In the 90s Bogor is one team that counts on the national scene , but in recent years the city of Bogor football achievements declined slightly . One cause of the resignation of football in the city of Bogor achievement is due to a lack of attention from the Bogor city government , lack of professional clubs in the city of Bogor and just rely Bogor city newspaper to disseminate information about the city of Bogor football . With the specific web application Pengcab PSSI Bogor , the board will have the right container to show progress , the programs that want to be able to instantly recognized and judged by the people of the city of Bogor , especially football players in Bogor..

This web application is built using PHP and Dreamweaver. Dreamweaver is one of the most popular framework compared to other frameworks. Database used in web applications is MySQL.

The results of testing the functionality in the Ordinary User, only feature Home and Login and Register menu that goes well, while menu News, Profiles, Organizer, and SSB are not yet available. On the user side of the Member, the only feature Home and Logout menu that goes well, whereas the Dashboard menu, Post, and a Member yet available. In subjective testing, taken from 22 respondents, it can be concluded that this application is not running well, It is shown by the results of the questionnaire questions point to the 3rd "Are there features on the web is already full enough?", As many as 50% of respondents stated "No" which means the features in this application is not complete and running well.
